

M7 Series

Cab Features

M7-131 - M7-151 - M7-171

Comfortable Cabin With a View

When you're in the fields from dawn to dusk, you want a ride that keeps you comfortable and working efficiently until the job is done. The M7's wide cabin is designed to do just that. With just four corner posts and no center pillars to get in the way, the view out the front, rear, and both sides is virtually unobstructed. The cabin design also reduces noise from the outside, so you can work in peace and comfort all day long.

Cabin Suspension

The M7 cabin is available with your choice of suspension systems: mechanical (spring), or rubber iso mount. Cabin suspension helps take the bumps out of the ride to keep you comfortable and efficient.

3-stage Front Suspension System (Option for Premium and Premium KVT Models only)

The M7's front suspension helps to maintain proper traction while the tractor has 3pt or draft loads while pulling in the field. Suspension stiffness can be adjusted manually or automatically, giving the operator the power to control power to the ground in the field or more comfortable, controlled ride during transport.
